

SILENCER

Description

Absorptive silencers with a design as provides very low restriction to exhaust gases, thus back pressure is negligible. Silencers of this type may also be used as secondary units on systems using reactive primary silencers.

Connections: 1,5" to 3", B:S:P: nipple connetion
3,5" to 7", flanges acc.to DIN2573 (PN6)
8" and larger, flanges acc.to DIN86044

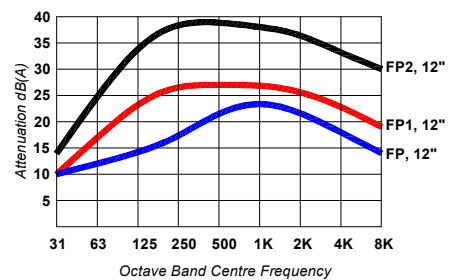

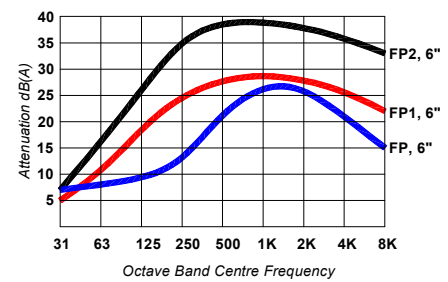

Finish: heat resistant paint.

Options

Material; mild Steel, Cor-Ten, stainless Steel Grades 304L, 316L & 409. Alternative configurations, mating flange assemblies, lifting lugs, support feet horizontal & vertical.

Typical Attenuation Curve
