

Baseplate can be delivered in oval or rectangle shape, se fig below.

## ALL METAL ISOLATOR Description

Resilient elements: Spring in high tensile steel, cushions in 18/8 stainless steel. Housing in zinc plated steel.

## Characteristics

A very soft isolator with integrated adjustable snubbing. Designed especially for suspension of mobile equipment.

Natural frequency: 5-9 Hz.
Mechanical strength: 5 g .
Temperature range: $-90^{\circ} \mathrm{C}-+300^{\circ} \mathrm{C}$.

| Ref. | Load range <br> daN (kg) | Damping | Amplification <br> $(Q)$ |
| :---: | :---: | :---: | :---: |
| VT4103 | $150-350$ | Undamped | $8-12$ |
| VT4105 | $250-500$ | Undamped | $8-12$ |
| VT4108 | $300-800$ | Undamped | $8-12$ |
| VT4113 | $150-350$ | Low damping | $6-10$ |
| VT4115 | $250-500$ | Low damping | $6-10$ |
| VT4118 | $300-800$ | Low damping | $6-10$ |
| VT4123 | $150-350$ | High damping | $3-5$ |
| VT4125 | $250-500$ | High damping | $3-5$ |
| VT4128 | $300-800$ | High damping | $3-5$ |

## Applications

Suspension of propulsion engines, generating sets, compressors, deck houses etc.

## Installation

The built in snubbers must be adjusted when the suspended equipment has its working condition. The adjustment is done by turning the upper part of the housing until a distance (A) of 2 mm is reached between the house and the snubbing cushions.

The height $(\mathrm{H})$ of the mount should be between 105-115 mm, depending on the load.

With correctly adjusted snubbers the maximum movement will be $\pm 4 \mathrm{~mm}$ in all directions.
